

P-Documents

Ung dung quan ly thu vien viet bang Java (Maven).

Cau truc thu muc hien tai

```
P-Documents/  
|-- pom.xml  
|-- README.md  
|-- src/  
|   |-- main/  
|       |-- java/  
|           |-- com/ptit/p/documents/  
|               |-- PDocuments.java    # diem vao chuong trinh  
|               |-- model/            # lop du lieu (Book, User,  
Borrowing...)  
|               |-- dao/                # truy xuat du lieu  
|               |-- view/              # hien thi giao dien (console/view  
class)  
|           |-- test/  
|           |-- java/  
|-- target/                            # thu muc sinh ra khi build
```

Quy uoc phan tang

- model: chi chua entity, DTO, POJO
- dao: chi chua CRUD va truy van du lieu
- view: chi chua logic hien thi, khong chua nghiep vu
- (de mo rong) service: nghiep vu va transaction
- (de mo rong) controller: nhan request, goi service, dieu huong view

Cau truc mo rong de xay dung day du MVC

Khi mo rong thanh web app MVC, nen bo sung:

```
src/main/java/com/ptit/p/documents/  
|-- controller/  
|-- service/  
|-- dao/  
|-- model/  
  
src/main/resources/  
|-- templates/  
|   |-- book/  
|   |-- user/  
|   |-- borrowing/
```

```
|  `-- stat/  
|-- static/  
|  |-- css/  
|  |-- js/  
|-- images/
```

Chay du an

```
mvn clean compile  
mvn exec:java -Dexec.mainClass="com.ptit.p.documents.PDocuments"
```
